HyperMac Nano (1800mAh) iPhone/iPod Battery

Is it a candy bar, cigarette lighter, compact makeup case? You will never believe your eyes until you remove the cover to reveal the world's only iPhone/iPod battery with a built-in charging cable. Unlike traditional battery packs with built-in rigid connectors, the HyperMac Nano features a flexible connector cable to allow the battery to move freely from the device, instead of simply sticking out from the base of the iPhone/iPod, which increases the chance of damage to iPhone/iPod socket. The removed battery cover snaps easily to the magnetized base of the battery to prevent loss. Of course, the good looks doesn't hurt at all.

Designed in 9 iPod Nano colors (black/silver/pink/red/orange/yellow/green/blue/purple) and housed in an exquisite aluminum casing, you will be spoilt for choice when finding the right battery pack to match your iPhone or iPod. From the makers of the multi-award winning HyperMac External MacBook Battery, you can expect the same high quality and technology. Also available: HyperMac Micro (3600mAh) and HyperMac Mini (7200mAh).

Product Features

- Patented design
- Built-in iPhone/iPod charging cable
- Flexible connection prevents damage
- 9 different iPod Nano colors
- Aluminum housing
- Magnetized base holds removed cover
- Attractive non-battery look
- Almost same size as iPod Nano 5G
- 1800mAh Lithium Ion Battery
